Vigilo

ACCESSORIES

CAN bus data for fleets and fuel monitoring

Connect your company vehicles to Vigilo and turn ECU data into useful information to cut costs, improve driving and anticipate breakdowns. Our CAN bus and FMS reading solution lets you check fuel consumption, fuel level, RPM, mileage, engine hours and other technical parameters from a single platform.

20+ years
of experience

163,842
connected vehicles

9 countries
with our own offices

24/7
support

Consumption and fuel

Analyse instantaneous and cumulative consumption, the level available, refuelling events and unusual variations to detect losses, discrepancies or possible fuel theft.

Engine data

Check RPM, temperature, running hours, mileage and other parameters available depending on the vehicle's make, model and protocol.

Driving analysis

Link CANBUS information to GPS journeys, idling, acceleration, braking and usage times to improve operational efficiency.

CAN BUS COMPATIBILITY

What data can we read from your vehicle?

Choose the vehicle type, make, model and year, and see instantly which CAN bus data you will get on the Vigilo platform. More than 4,500 models from 300 makes.

* Available depending on the vehicle's equipment or version. Indicative compatibility: we confirm it with the chassis number (VIN) before installation.

CAN bus and GPS on a single platform

Vigilo centralizes GPS tracking, vehicle activity and CAN bus data, so dispatch, operations and administration all work from a single source of information.

Turn vehicle data into savings and control

Request a compatibility study to find out which CAN bus data you can get from your fleet.
